## Disclosure index

The disclosure report of European Depository Bank SA complies with the following regulatory requirements set out in Commission Implementing Regulation (EU) 2021/637 in connection with Regulation (EU) No. 575/2013.

#	Disclosure	Name	CRR Article	Reference
<b>Key metrics and overview of risk-weighted exposure amounts</b>				
1	EU OV1	Overview of total risk exposure amounts	Art. 438(d)	Chapter 3.2.1
2	EU KM1	Key metrics template	Art. 447 (a) to (g) and Art. 438 (b)	Chapter 2
3	EU INS1	Insurance participations	Art. 438 (f)	N/A – EDB does not engage in insurance participations
4	EU INS2	Financial conglomerates information on own funds and capital adequacy ratio	Art. 438 (g)	N/A – EDB does not form a financial conglomerate
5	EU OVC	ICAAP information	Art. 438 (a) and (c)	Chapter 3.2
<b>Risk management objectives and policies</b>				
6	EU OVA	Institution risk management approach	Art. 435 (1)	Chapter 1.3
7	EU OVB	Disclosure on governance arrangements	Art. 435 (2)	Chapter 1.2.3
<b>Scope of application</b>				
8	EU LI1	Differences between the accounting scope and the scope of prudential consolidation and mapping of financial statement categories with regulatory risk categories	Art. 436 (c)	N/A – EDB is not subject to regulatory consolidation
9	EU LI2	Main sources of differences between regulatory exposure amounts and carrying values in financial statements	Art. 436 (d)	N/A – EDB is not subject to regulatory consolidation
10	EU LI3	Outline of the differences in the scopes of consolidation (entity by entity)	Art. 436 (b)	N/A – EDB is not subject to regulatory consolidation
11	EU LIA	Explanations of differences between accounting and regulatory exposure amounts	Art. 436 (b) and (d)	N/A – EDB is not subject to regulatory consolidation
12	EU LIB	Other qualitative information on the scope of application	Art. 436 (f), (g) and (h)	N/A – EDB is not subject to regulatory consolidation
13	EU PV1	Prudent valuation adjustments (PVA)	Art. 436 (e)	N/A – EDB does not apply the core approach
<b>Own funds</b>				
14	EU CC1	Composition of regulatory own funds	Art. 437 (a), (d), (e) and (f)	Chapter 3.1
15	EU CC2	Reconciliation of regulatory own funds to balance sheet in the audited financial statements	Art. 437 (a)	Chapter 3.1
15	EU CCA	Main features of regulatory own funds instruments and eligible liabilities instruments	Art. 437 (b) and (c)	Chapter 3.1
<b>Countercyclical capital buffers</b>				
16	EU CCyB1	Geographical distribution of credit exposures relevant for the calculation of the countercyclical capital buffer	Art. 440 (a)	Chapter 3.2.2

#	Disclosure	Name	CRR Article	Reference
17	EU CCyB2	Amount of institution specific countercyclical capital buffer	Art. 440 (b)	Chapter 3.2.2
<b>Leverage ratio</b>				
18	EU LR1 – LRSum	Summary reconciliation of accounting assets and leverage ratio exposures	Art. 451 (1) (b)	Chapter 3.3
19	EU LR2 – LRCom	Leverage ratio common disclosure	Art. 451 (1) (a) and (b), Art. 451 (3) taking into account, where applicable Art. 451 (1) (c) as well as Art. 451 (2)	Chapter 3.3
20	EU LR3 – LRSpI	Split-up of on-balance sheet exposures (excluding derivatives, SFTs and exempted exposures)	Art. 451 (1) (b)	Chapter 3.3
21	EU LRA	Disclosure of LR qualitative information	Art. 451 (1) (d) and (e)	Chapter 3.3
<b>Liquidity requirements</b>				
22	EU LIQA	Liquidity risk management	Art. 451a (4)	Chapter 6.1
23	EU LIQ1	Quantitative information of LCR	Art. 451a (2)	Chapter 6.2
24	EU LIQB	on qualitative information on LCR, which complements template EU LIQ1	Art. 451a (2)	Chapter 6.2
25	EU LIQ2	Net Stable Funding Ratio (NSFR)	Art. 451a (3)	Chapter 6.2
<b>Credit risk quality</b>				
26	EU CRA	General qualitative information about credit risk	Art. 435 (1) (a), (b), (d) and (f)	Chapter 4.1
27	EU CRB	Additional disclosure related to the credit quality of assets	Art. 442 (a) and (b)	N/A – EDB is no large or other listed institution
28	EU CR1	Performing and non-performing exposures and related provisions	Art. 442 (c) and (e)	Chapter 4.2
29	EU CR1-A	Maturity of exposures	Art. 442 (g)	Chapter 4.2
30	EU CR2	Changes in the stock of non-performing loans and advances	Art. 442 (f)	N/A – EDB does not have such positions
31	EU CR2a	Changes in the stock of non-performing loans and advances and related net accumulated recoveries	Art. 442 (c) and (f)	N/A – EDB does not have such positions
32	EU CQ1	Credit quality of forborne exposures	Art. 442 (c)	N/A – EDB does not have such positions
33	EU CQ2	Quality of forbearance	Art. 442 (c)	N/A – EDB does not have such positions
34	EU CQ3	Credit quality of performing and non-performing exposures by past due days	Art. 442 (d)	Chapter 4.2
35	EU CQ4	Quality of non-performing exposures by geography	Art. 442 (c) and (e)	Chapter 4.2
36	EU CQ5	Credit quality of loans and advances to non-financial corporations by industry	Art. 442 (c) and (e)	N/A – EDB does not have such positions
37	EU CQ6	Collateral valuation - loans and advances	Art. 442 (c)	N/A – EDB does not have such positions
38	EU CQ7	Collateral obtained by taking possession and execution processes	Art. 442 (c)	N/A – EDB does not have such positions

#	Disclosure	Name	CRR Article	Reference
39	EU CQ8	Collateral obtained by taking possession and execution processes – vintage breakdown	Art. 442 (c)	N/A – EDB does not have such positions
<b>Use of credit risk mitigation techniques</b>				
40	EU CRC	Qualitative disclosure requirements related to CRM techniques	Art. 453 (a) to (e)	Chapter 4.3
41	EU CR3	CRM techniques overview: Disclosure of the use of credit risk mitigation techniques	Art. 453 (f)	Chapter 4.3
<b>Use of the Standardised Approach</b>				
42	EU CRD	Qualitative disclosure requirements related to standardised approach	Art. 444 (a) to (d)	Chapter 4.2
43	EU CR4	Credit risk exposure and CRM effects	Art. 453 (g), (h) and (i), Art. 444 (e)	Chapter 4.3
44	EU CR5	Standardised approach	Art. 444 (e)	Chapter 4.3
<b>Use of IRB approach to credit risk</b>				
45	EU CRE	Qualitative disclosure requirements related to IRB Approach	Art. 452 (a) to (f)	N/A – EDB does not apply the IRB Approach
46	EU CR6	IRB approach – Credit risk exposures by exposure class and PD range	Art. 452 (g)	N/A – EDB does not apply the IRB Approach
47	EU CR6-A	IRB Approach – Scope of the use of IRB and SA approaches	Art. 452 (b)	N/A – EDB does not apply the IRB Approach
48	EU CR7	IRB approach – Effect on the Risk Weighted Exposure amounts of credit derivatives used as CRM techniques. Fixed template	Art. 453 (j)	N/A – EDB does not apply the IRB Approach
49	EU CR7-A	IRB approach – Disclosure of the extent of the use of CRM techniques	Art. 453 (g)	N/A – EDB does not apply the IRB Approach
50	EU CR8	RWEA flow statements of credit risk exposures under the IRB approach. Fixed template	Art. 438 (h)	N/A – EDB does not apply the IRB Approach
51	EU CR9	IRB approach – Back-testing of PD per exposure class. Fixed template.	Art. 452 (h)	N/A – EDB does not apply the IRB Approach
52	EU CR9.1	IRB approach – Back-testing of PD per exposure class (only for PD estimates in accordance with point (f) of Article 180(1) CRR	Art. 452 (h), Art. 180 (1) (f)	N/A – EDB does not apply the IRB Approach
<b>Specialised lending</b>				
53	EU CR10	Specialised lending and equity exposures under the simple risk-weighted approach	Art. 438 (e)	N/A – EDB does not engage in specialised lending activities
<b>Exposures to counterparty credit risk</b>				
54	EU CCRA	Qualitative disclosure related to CCR	Art. 439 (a) to (d)	Chapter 4.4
55	EU CCR1	Analysis of CCR exposure by approach	Art. 439 (f), (g) and (k)	Chapter 4.4
56	EU CCR2	Transactions subject to own funds requirements for CVA risk	Art. 439 (h)	Chapter 4.4
57	EU CCR3	Standardised approach – CCR exposures by regulatory exposure class and risk weights	Art. 444 (e)	Chapter 4.4
58	EU CCR4	IRB approach – CCR exposures by exposure class and PD scale	Art. 452 (g)	N/A – EDB does not apply the IRB Approach

#	Disclosure	Name	CRR Article	Reference
59	EU CCR5	Composition of collateral for CCR exposures	Art. 439 (e)	N/A – EDB does not use collateral in derivative transactions
60	EU CCR6	Credit derivatives exposures	Art. 439 (j)	N/A – EDB does not have credit derivatives exposures
61	EU CCR7	RWEA flow statements of CCR exposures under the IMM	Art. 438 (h)	N/A – EDB does not apply the IMM
62	EU CCR8	Exposures to CCPs	Art. 439 (i)	N/A – EDB does not have exposures to CCPs
<b>Exposures to securitisation positions</b>				
63	EU SECA	Qualitative disclosure requirements related to securitisation exposures	Art. 449 (a) to (i)	Chapter 8
64	EU SEC1	Securitisation exposures in the non-trading book	Art. 449 (j)	Chapter 8
65	EU SEC2	Securitisation exposures in the trading book	Art. 449 (j)	Chapter 8
66	EU SEC3	Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as originator or as sponsor	Art. 449 (k) (i)	Chapter 8
67	EU SEC4	Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as investor	Art. 449 (k) (ii)	Chapter 8
68	EU SEC5	Exposures securitised by the institution - Exposures in default and specific credit risk adjustments	Art. 449 (1)	Chapter 8
<b>Use of standardised approach and internal model for market risk</b>				
69	EU MRA	Qualitative disclosure requirements related to market risk	Art. 435 (1) (a) to (d)	Chapter 5.1
70	EU MR1	Market risk under the standardised approach	Art. 445	Chapter 5.2
71	EU MRB	Qualitative disclosure requirements for institutions using the internal Market Risk Models	Art. 455 (a), (b), (c) and (f)	N/A – EDB is a non-trading book institution with no material trading activity and no application of internal models

# 1. Introduction

## 1.1. Regulatory Introduction

The Pillar 3 disclosure report (hereafter “the report”) for the financial year ending 31 December 2023 is prepared and published by European Depositary Bank SA (hereafter “EDB”, “the Bank”) in accordance with Part Eight of Regulation (EU) No. 575/2013 (hereafter “CRR”) on disclosure requirements for institutions as well as the additional requirements set out in Directive 2013/36/EU (hereafter “CRD IV”). The report further follows the requirements set out in Commission Implementing Regulation (EU) 2021/637 of 15 March 2021 laying down Implementing Technical Standards (hereafter “ITS”) with regards to the public disclosures by institutions and transposing the EBA ITS on institutions public disclosures into European law.

In accordance with Article 432 CRR, the information disclosed in this report is subject to the principle of materiality. Furthermore, information regarded as proprietary or confidential is not subject to disclosure. EDB does not operate as a financial holding company within the meaning of Article 4 (1) point 20 CRR. In addition, EDB does neither meet the criteria for large institutions set out in Article 4 (1) point 146 CRR nor does EDB comply with the definition of G-SII (Global Systemically Important Institution) or O-SII (Other Systemically Important Institution) set out in Article 131 CRD IV.

In accordance with Article 433 CRR, EDB publishes its Pillar 3 disclosure report on an annual basis on its website.

All disclosures published in this report are denominated in the Bank’s reporting currency Euro (hereafter “EUR”). Due to rounding, minor differences might occur in the disclosed figures which are considered non-material in line with the Bank’s risk profile. This report does not constitute financial statements and is not subject to external audit. However, some disclosed information is part of EDB’s audited financial statements as at 31 December 2023. EDB publishes its annual accounts in accordance with LUX GAAP standards. In contrast to this, the Bank’s regulatory financial reporting (“FINREP”) must be prepared in line with IAS/IFRS standards.

## 1.2. Presentation of the Bank

### 1.2.1. Structure

EDB is a credit institution established as a Société Anonyme on 15 February 1973 by Prosper-Robert Elter, Notary. In accordance with the Law of 5 April 1993 on the Financial Sector, as amended, the Bank operates as fully licensed bank under the prudential supervision of the Commission de Surveillance du Secteur Financier (hereafter “CSSF”).

The Bank registered office is located at: L-5365 Munsbach, 9a, Rue Gabriel Lippmann. As April 1, 2024 the registered office changed from the previous address: L-5365 Munsbach, 3, Rue Gabriel Lippmann.

The Bank is registered in the Commercial Registry of the City of Luxembourg under No B10700.

The Bank’s memorandum and articles of association were last amended by notary deed of Marc Loesch, Notary practising in Luxembourg, dated December 09, 2022 and published in the RESA [Official Gazette], number 009 of January 11, 2023.

EDB Dublin Branch has been established in 2019 and focuses solely on offering Depositary and Custody Services to a wide range of fund structures and SPVs. Depositary services offered include both full-depositary and depositary-lite services.

EDB Malta Branch has also been established in 2019. EDB received Malta Financial Services Authority (hereafter “MFSA”) principal approval for the “Category 4a Investment Services Licence” of EDB Malta Branch on November 19, 2019.

EDB London Branch was established on January 24, 2020. The top-up application for a full Depositary license was approved on September 8, 2020. The depositary activities ended in December 2023 due to expiration of the Depositary license. EDB London Branch is expected to be closed in 2024.

In 2023, EDB acquired a 100% participation in Bank of America Custodial Services (Ireland) Limited. As of July 3, 2023, the closing date of the transaction, the Bank renamed its subsidiary to EDB Custodial Services Ltd. (hereafter "EDBCSL"). In a second phase, clients will be novated to EDB Dublin branch as depositary, in order to simplify EDB's legal entity structure.

On December 14, 2023, Apex Group/EDB and Edmond de Rothschild (Europe) (hereafter "EdRE") signed an agreement for the acquisition of the ThirdParty Asset Servicing activities based in Luxembourg to Apex Group. As part of this agreement, Apex Group will also acquire Edmond de Rothschild's fund administration, transfer agent and custody activities for Private Equity and Infrastructure funds. The acquisition comprises two key components. One is a share deal with EdRE's subsidiary Edmond de Rothschild Asset Management (Luxembourg), which only concerns the Apex Group and is not directly impacting EDB. The second component is an asset deal relating to depositary and custody activities (including related services) currently booked in EdRE, and relevant to EDB. The closing of the transaction is estimated end of Q4 2024.

The Bank is a wholly owned subsidiary of, and whose ultimate parent company is, Apex Group Limited, a corporation organized under the laws of Bermuda.

### **1.2.2. Business model and activities**

The Bank's activities focus on services for investment funds and securitisations, in particular with its depositary bank function and commission trading, as well as on business with institutional clients. The business strategy of the Apex Group Ltd. Bermuda, as superordinate company, provides the framework for the overarching business strategy of EDB. The core business areas are:

- Depositary banking;
- Custodian banking; and
- Institutional client services.

Activities also include lending business and payment transaction services. Client deposits are intrinsic to the business model, especially those derived from investment funds that, in line with the risk strategy on the assets side, are distributed mainly to German sovereign issuers and counterparts as well as supranational issuers with a "0" (zero) risk weighting.

### **1.2.3. Governance**

#### ***(Article 435 (2) (a), (d) and (e) CRR)***

#### ***Table EU OVB – Disclosure on governance arrangements***

The Corporate Governance at EDB is subject to continuous development to ensure alignment with industry best practice. The EDB Corporate Governance is based on the following pillars:

- Appropriate composition of its Board and Committees;
- Clear distribution of roles and responsibilities between the Board of Directors and its Committees;
- Efficient control and management of risks through adherence to a "three lines of defence" model; and
- Sound decision-making process and robust information model.

#### **Board of Directors**

As at 31 December 2023, EDB's Board of Directors comprised of seven members, namely Charles Muller (Independent Non-Executive Director Chair), Mr. Peter Hughes (Non-Executive Director), Prof. Joseph Bannister (Independent Non-Executive Director), Mr. David Claus (Chief Executive Officer), Ms. Gilda Neiman (Independent Non-Executive Director), Mr. David Rhydderch (Non-Executive Director) and Mr. Roland Steies (Independent Non-Executive Director).

The Board of Directors has overall responsibility for the institution. It defines, monitors and bears responsibility for the implementation of a robust central administration, governance and internal control arrangement. This includes a clearly structured internal organisation and independent internal control functions with the appropriate authority, stature and resources with respect to their responsibilities. The implemented framework must ensure the sound and

prudent management of the Bank, preserve its continuity and protect its reputation. The Board of Directors are committed to implementing the strategic plan of EDB and ensuring the alignment of the strategic and operational plan of EDB with the shareholders strategy in an independent and transparent manner for the well-being of clients and staff and to increase shareholder value.

The Board of Directors monitors the implementation by the Executive Management Board of the internal governance arrangement and guiding principles, and critically assesses and approves, at least once a year, these internal governance arrangements. These assessments and approvals aim to ensure that the internal governance arrangements continue to comply with the requirements of CSSF Circular 12/552 as amended, applicable laws and regulations and the objectives of effective, sound and prudent business management. The members of the Executive Management Board and Department Heads are obliged to objectively and critically examine the applicable rules and regulations for which they are responsible to ensure compliance.

The Board of Directors carries out a critical evaluation of the rules and regulations at least once a year.

All Directors are appointed by the shareholders of EDB.

### **Committees at the Board of Director Level**

Specialised Committees of the Board of Directors have been created to implement sound corporate governance and increase the effectiveness of the Board.

Three Specialised Committees are appointed to assist the Board of Directors with critical assessments in respect of the organisation and operation of EDB:

- Audit, Compliance and Risk Committee;
- Appointments & Remuneration Committee; and
- IT & Cybersecurity Committee.

### **Audit, Compliance and Risk Committee**

The BoD has appointed an Audit, Compliance and Risk Committee (hereafter "ACRC"), effective as of January 1st 2023, following the merger of the "Audit and Governance Committee" and the "Risk Management Committee". The ACRC acts under the authority of the BoD and is assisting it in carrying out its responsibilities relating to the accounting and financial reporting functions, internal control and governance policies, and making recommendations to the Board, identifying any matters within its remit in respect of which it considers that further action/approval is required.

The purpose of the ACRC is to oversee:

- Accounting and financial reporting processes;
- Audits of EDB's financial statements;
- Compliance by EDB with legal and regulatory requirements;
- EDB compliance and risk management frameworks;
- EDB's capital, liquidity and funding planning and strategy;
- EDB's risk appetite statements, including risk tolerance levels and supporting limits; and
- Effectiveness and performance of the internal control and audit functions.

The ACRC's responsibility in this regard is one of oversight and review while the day-to-day management is the responsibility of the EDB Executive Management Board.

In addition to the foregoing responsibilities, the ACRC carries out any other responsibilities assigned to it by the Board from time to time and takes any actions or carries out any other responsibilities as may be necessary to comply with the Competent Authority rules and regulations and any applicable law in the Grand Duchy of Luxembourg and any jurisdiction where EDB is operating.

Within the financial year 2023, the Committee met a total of nine times with the last meeting taking place on 08.11.2023.

### **Appointments & Remuneration Committee**

The purpose of the Appointments and Remuneration Committee is to oversee the implementation of the appointments and remuneration plan of EDB's Board of Directors as agreed with the shareholders –the Apex Group

Ltd. The Appointments and Remuneration Committee will review all selection procedures, standards and qualifications of the EDB's Board of Directors, senior management and other key staff involved in the operations. The Appointments and Remuneration Committee will also make recommendations on the EDB's appointment and remuneration plan as may be necessary.

### **IT & Cybersecurity Committee**

The purpose of the IT and Cybersecurity Committee is to oversee the EDB's status, plans and developments in regards to IT architecture, IT projects, IT security and internal IT control practices. Moreover, the Committee oversee the control, monitoring and reporting of IT and Cybersecurity functions of EDB and address such other matters as are normally within the remit of the IT and Cybersecurity Committee, including, without limitation, compliance by EDB with legal and regulatory requirements and reporting processes.

### **Executive Management Board**

The Executive Management Board is in charge of the day-to-day management of the bank and its branches, in accordance with the strategic directions and the key policies approved by the Board of Directors, taking into account considering the Bank's long-term financial interests, solvency, liquidity situation and risk appetite.

As at 31 December 2023, the Bank was managed by five members of the Executive Management Board, namely Mr. David Claus (Chief Executive Officer), Mr. Holger Barth, Ms. Cecilia Gejke, Mr. Jean-François Thils and Mr. Robert Steele.

In order to ensure solid and prudent management, including the risks associated with the business activities, the Executive Management Board revised the Bank's rules and regulations in the third quarter of 2023.

To this end, the existing documents regarding the organizational structure, policies, charters, procedures and processes were reviewed and, where deemed necessary, adapted based on the strategies and guiding principles specified by the Board of Directors.

The Executive Management Board is responsible to ensure that the Bank has the internal audit mechanisms, technical infrastructure and human resources necessary to assure solid and prudent management (including risk management) within the framework of the applicable rules and regulations.

The Executive Management Board informs the Board of Directors in detail, in writing and regularly, at least once a year, about the implementation, appropriateness, effectiveness and compliance with the rules and regulations.

### **Committees at the Executive Management Board Level**

In order to ensure a suitable internal control environment, sound implementation by senior management and operating staff is required. This will be carried out by a number of Executive Management Board Committees as detailed below:

#### **Extended Executive Management Board Committee**

The Extended Executive Management Board Committee was set up in September 2022 with the purpose of supporting the Executive Management Board in their role as collegiate body in charge of the day-to-day management of the bank and its branches. In addition to the Executive Management Board members, meetings of the Executive Management Board are open to attendance to any EDB employee being an occasional invitee for a particular agenda item or to any EDB permanent invitee ("Extended Executive Management Board Committee"). Permanent invitees are the department heads and branch managers of EDB.

#### **Compliance & Risk Committee (former Compliance, Risk and Audit Committee)**

The Executive Management Board has appointed a Compliance & Risk Committee (hereafter "CRC"), effective as of July 1, 2023. The purpose of the CRC is to manage the risks associated with EDB's compliance and risk management frameworks, the performance and status of the internal risk assessments conducted by the control functions and ensuring compliance with applicable law and regulatory requirements. The CRC is also the forum for escalation of any ad hoc matters falling under the ACRC remit on an Executive Management Board level by the internal control functions, internal audit, Head of Legal, Head of Finance and the Banking & Supervisory team.

The Bank had previously set up a dedicated Recovery & Resolution Planning Committee (“RRPC”) approved by the Board of Directors. On the Recovery & Resolution Planning Committee meeting held on 12.12.2023 it was decided to merge the RRPC with the CRC to increase efficiency at decision making process. Regarding the Recovery Plan, the objective of the CRC is to monitor the effectiveness and updating of the recovery plan and to approve its key contributions. Additionally, it establishes a Recovery Plan Team and appoints its members. During a critical situation, the CRC would discuss the nature of the critical event and evaluate potential recovery options. In relation to the Resolution Planning the objectives of the CRC are to ensure the Bank’s compliance with resolution planning requirements, support the CSSF for the purpose of implementing CSSF’s resolution decision and carrying out resolution activities as well as gathering, validation and delivery of information to CSSF and approval and starting of the communication process along to the communication plan.

### Joint Branch Committee

The role of the Joint Branch Committee is to ensure that the EDB culture and values are instilled in the operating branches held in the UK, Dublin and Malta, in the absence of direct interaction between staff in Luxembourg and in the branches. Its mandate is also to support in facilitate discussion on operational issues at branch level through discussion and coordination, to ensure that the branches are operating within the license issued by Competent Authorities as well as that the branches have sufficient resources. Furthermore, Competent Authorities require the branches to set up their own internal branch committee which should report to the Joint Branch Committee. On 20 November 2023, the Executive Management Board decided to dissolve the Joint Branch Committee after the conclusion of the Q4 2023 meeting in March 2024.

### Outsourcing Committee

The purpose of the Outsourcing Committee is to enable EDB to properly manage its risks associated with outsourcing and to ensure that the outsourcing of material (or “critical or important”) functions does not impair the quality of internal controls or ability to monitor ongoing compliance with applicable laws and regulatory requirements.

## 1.2.4. Directorships and recruitment policy

### **(Article 435 (2) (a), (b) and (c) CRR)**

The Bank’s Board of Directors nominates, reviews and assesses the composition of the Executive Management Board and recommends the appointment of its members who must comply with the requirements for fitness and propriety (“suitability test”). The Board of Directors further oversees the conduct of the annual review of the Executive Management Board effectiveness.

The Bank implemented its recruitment policy and diversity strategy for the selection of members of the Executive Management Board in accordance with the following principles:

The Bank acknowledges the importance of having a diverse Executive Management Board and considers this an important element in maintaining a competitive advantage where a diverse Executive Management Board includes individuals with different skills. Those skills shall match to the relevance of the business of the Bank, including e.g. financial services, regional and industry experience, background, nationality, gender or age.

EDB seeks to have persons of the highest competence to carry out effective management in compliance with applicable laws and regulations.

The following table depicts the areas of responsibility of the Bank’s Executive Management Board members according to their experience in the financial services sector in Luxembourg and in other jurisdictions:

<b>Executive Management Board – Areas of Responsibility</b>				
<b>David Claus</b>	<b>Holger Barth</b>	<b>Jean-François Thils</b>	<b>Robert Steele</b>	<b>Cecilia Gejke</b>
Chief Executive Officer	Managing Director	Managing Director	Managing Director	Managing Director

Sales / Treasury	Depository Oversight	IT	Onboarding & Account Management	Risk Controlling
HR	Custody Operations	Digital Banking	Marketing	Compliance & Data Protection
Legal	Credit		Relationship Management	ICT Risk
Process Management	Facility Management & Administration		Complaints	Accounting & Financial Reporting
Internal Audit	Branches Oversight			
Banking Supervision Support	Outsourcing			

The mandates held by the Bank's Management Body as at 31 December 2023 are as follows:

<b>Executive Management Board</b>	<b>Function</b>	<b>Company</b>
<b>David Claus</b>	Chief Executive Officer, Member of the Executive Management Board and Board of Directors	European Depository Bank SA, Luxembourg
<b>Holger Barth</b>	Managing Director, Member of the Executive Management Board	European Depository Bank SA, Luxembourg
<b>Jean-François Thils</b>	Managing Director, Member of the Executive Management Board	European Depository Bank SA, Luxembourg
<b>Robert Steele</b>	Managing Director, Member of the Executive Management Board	European Depository Bank SA, Luxembourg
<b>Cecilia Gejke</b>	Managing Director, Member of the Executive Management Board	European Depository Bank SA, Luxembourg

### 1.2.5. Scope of application

#### *(Article 436 (b) CRR)*

Whereas EDB and its three branches – Dublin, Malta and London – are covered throughout this disclosure report, the CSSF agreed that EDBCSL does not need to be included in the scope of prudential supervision on a consolidated basis in accordance with Article 19.2 (b) CRR. The Bank is authorised under Article 2 of the Law of 5 April 1993 on the financial sector as amended and is not subject to consolidation pursuant to Article 49 (4) of this law, the Bank does neither prepare its own partial consolidated financial statements in accordance with Article 80 of the Law of 17 June 1992 as amended nor is it subject to prudential consolidation requirements. Consequently, this report is prepared on standalone basis.

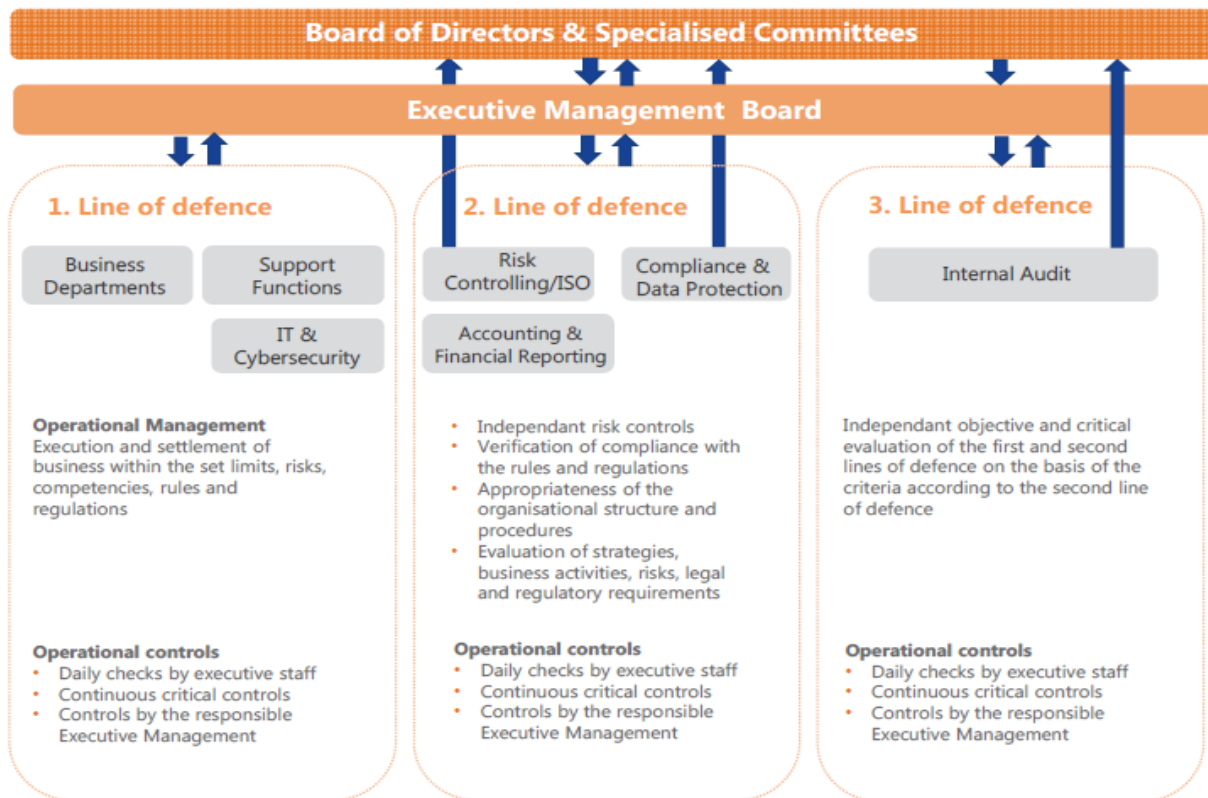

The Bank publishes the Pillar 3 disclosure report on an annual basis in accordance with Article 433 CRR.

### 1.3. Risk management setup

(Article 435 (1) CRR)

**Table EU OVA – Institution risk management approach**

The Bank's risk management is based on the three lines of defence model within the strategies and guiding principles set by the Board of Directors. In regard to Risk Management, the Bank has set up a specialised ACRC of the Board of Directors and the CRC of the Executive Management Board.

Each line of defence has clearly defined roles and responsibilities to ensure comprehensive risk management, monitoring and control is ensured for all the Banks activities. The Bank has a dedicated 2 Line of Defence function for risk in the form of a Risk Controlling department, whose head of department is the appointed Chief Risk Officer in accordance with Circular CSSF 12/552 as amended. The risk control function is an independent function. The Chief Risk Officer has the authorization for a direct access to Board of Directors and its specialized Committees, the Executive Management Board, the external auditor and the CSSF. In addition to the risk control function, the 2 Line of Defence function is carried out by the Compliance department headed by a Chief Compliance Officer. Furthermore, the Bank has installed a fully independent 3 Line of Defence function in the form of Internal Audit, headed by the Chief Internal Auditor. With regards to identification, assessment and monitoring of IT and (Cyber) security risks, the Risk Controlling department is supported by the Information Security Officer.

In general, the main task of the internal control functions is to monitor compliance with all internal regulations and procedures that fall within their remit and to regularly assess their adequacy.

The specific responsibilities of the risk control function include the following:

- Identifying, measuring, monitoring and communicating the full range of risks that the Bank and its branches are, or may be, exposed to and ensuring adequate risk management is in place;
- Assisting the Executive Management Board in controlling risks;

- Compilation of a comprehensive, objective and relevant overview of the risks, the risk-bearing capacity and the outcome of the stress test scenario program; and
- Conducting prudent qualitative and quantitative risk assessments and back testing of valuations.

The ACRC as well as the CRC at Executive Management Board level will ensure a regular, systematic and holistic monitoring of the risk profile of EDB including its branches.

The risk strategy, which is supplemented by the credit risk and capital resources strategies, is closely linked to the Bank's business strategy. The risk strategy introduces the risk-bearing capacity concept and guiding principles that govern the identification, measurement, reporting, control and monitoring of risks. It is geared to achieving an attractive return on equity through a cautious approach to risk, taking into account both external and internal influencing factors. It is subdivided into general strategic guiding principles and sub-strategies for all risk types that are considered significant for EDB's risk profile.

The Board of Directors reviews the risk strategy annually, or on an ad hoc basis in the event of significant changes in the business structure.

A core element of the risk strategy and the overarching Risk Management Framework is the Risk Appetite.

The Bank's Risk Appetite articulates the overall levels and types of risks that the Bank is willing to assume within its risk-bearing capacity including qualitative and quantitative risk limits as embedded in the Bank's policies and procedures. The Bank's Risk Appetite provides a common framework and comparable measures for senior management and the Board of Directors to communicate, understand, and assess the types and levels of risk that they are willing and able to accept.

It defines the boundaries within which senior management (Executive Management Board, branch managers, department heads and responsible persons for specific functions) is expected to operate when pursuing the Bank's business strategy.

As a matter of principle, the Risk Appetite of the Bank is oriented in such a way that it does not endanger the risk coverage potential, while at the same time complying with regulatory requirements.

The purpose of the capital resources strategy is to ensure that the Bank is solvent and that there is adequate capital available at all times. The Bank also performs the Internal Capital Adequacy Process and Internal Liquidity Adequacy Process (ICLAAP) on an annual basis. Under the ICLAAP, the Bank ensures it has adequate internal capital and liquidity resources for covering all significant risks in order to execute its business plan while adhering to the Bank's risk strategy and maintaining regulatory compliance.

The credit risk strategy defines the Bank's primary lending business as a limited and supplementary business activity to the core business areas of depositary and custody services, serving of external asset managers and institutional client services. It focuses on low-risk, well-secured loans to funds, clients of external asset managers, professional private clients and companies for which EDB provides depositary or custody services.

Risk limits for the significant risk types, credit risk, market price risk and operational risk are reviewed at least on an annual basis to ensure alignment and relevance with the Bank's business and risk strategy. The allocated risk limits result in the risk capital requirement, which is compared to the risk coverage potential within the framework of the risk-bearing capacity concept. The risk limits are also an expression of Bank's risk appetite.

The Bank carries out an annual risk register assessment (including the Risk Control & Self-Assessment) for all its entities. Its objective is to ensure the effective control of all risks of the Bank with the aid of systematic risk management and to differentiate between material risks and non-material risks. This distinction is the basis for the further handling of risks in the procedures of the Bank. The material risks are quantified, limited and taken into account for the risk-bearing capacity calculation. In addition, alarm thresholds are implemented for these risks, which serve as early warning indicators and contribute to compliance with the limits. The principle of proportionality applies to non-material risks. The annual performance of the risk register assessment ensures a regular review of the materiality of the risks.

Significant risks have been identified as being:

- Credit risk;
- Market risks;
- Operational risks; and
- Liquidity risk.

For the EDB branches in Dublin and Malta only operational risks have been classified as significant. In view of the expired Depository license of EDB London branch and the ending of its depository activities, no operational risk assessment has been performed for the EDB London Branch as at year-end 2023.

For credit risks, market price risks and operational risks, the Bank uses value-at-risk (VaR) to quantify the risk. The risk values are consistently determined with a confidence level of 99.5%. Liquidity risk is managed and controlled in the form of minimum liquidity requirements. Alarm thresholds are in place for these risks, serving as early warning indicators and contributing to adherence to applicable limits. The Risk Controlling department actively monitors the risks and regularly reports to the Executive Management Board, the Board of Directors and the Supervisory Authority.

In accordance with Circular CSSF 11/506 as amended (“Principles of a sound stress testing program”), EDB performs a thorough stress test for all risks defined as significant in order to be able to simulate risks even in extreme market and business situations. The analyses are based on a combination of hypothetical and historical market scenarios, and sensitivity analyses of individual risk factors. Hypothetical market scenarios are fictional scenarios defined by the Bank itself in which relevant risk factors are changed while for a sensitivity analysis, just one risk factor is changed. The Bank also performs reverse stress tests by altering the key risk factors to such an extent that the Bank incurs a loss that it can no longer bear.

The Bank strives to prevent risk concentrations through the existing limit systems. The unintentional emergence of risk concentrations is counteracted, even in case of compliance with all limits, through their identification and communication. The Bank also analyses cross-risk concentrations. The basis for this is the risk measurement of the individual risk types and the intra-risk concentrations recognized therein.

The Risk Controlling department produces a quarterly risk report to inform the Executive Management Board, the Board of Directors, the Chief Compliance Officer and Chief Internals Auditor as well as the Apex Group Chief Risk Officer, of the overall risk situation regarding significant risks, including the extent to which the allocated risk limits and the risk coverage potential are at capacity. The risk report draws attention to any risk concentrations, peculiarities in the reporting period, or transactions that deviate from the strategy. Moreover, this report focuses on the effects that stress tests in individual risk types have on the risk-coverage potential on cross-risk topics and on bank-wide risk management aspects.

In addition, a daily report is provided to the Executive Management Board, the Sales & Treasury department, detailing own holding exposures generating market price risks and their economic outcomes, and liquidity risks drawn up as part of liquidity risk management.

In addition to the measures outlined above, the Bank has established further supportive procedures to control the entirety of risks it is exposed to. These include a limit catalogue, monitoring of key risk indicators, controlling of outsourcing, risk analysis of new products, risk monitoring of participations, monitoring of unusual and non-transparent business activities and crisis management. The Bank has documented procedures for identification, assessment and monitoring of IT and (Cyber) security risks on which the CRO is supported by the Information Security Officer. These procedures and instruments complete the picture of the Bank's overall risk situation and serve as a means of early risk detection:

- **Limit catalogue:** The Bank’s regulatory and internal limits are compiled in a limit catalogue for the purpose of risk steering. For each limit, the limit catalogue specifies the monitoring department and the control instance.
- **Key Risk Indicators:** EDB performs a group-wide monitoring and reporting of the Bank’s key risk indicators. The key risk indicators are critical predictors of significant events which can adversely impact EDB’s risk situation. They monitor changes in the levels of risk exposure and contribute to the early warning signs that enable the Bank to report risks, prevent crisis and mitigate them in time.

- **Outsourcings:** In order to appropriately manage risks related to outsourcing and ensuring regulatory compliance, the Bank performs a comprehensive review and materiality assessment of such activities, including intra Group outsourcing. The assessment is coordinated by the Bank's dedicated outsourcing function with input and sign-off from relevant key stakeholders, including the control functions. In order to achieve a prudent governance of the outsourcing activities an Outsourcing Committee is in place.
- **New Products:** In order to minimise risks from new products, EDB applies a "New Product Process" (NPP) to ensure that the obligations associated with the product are fulfilled. The term "new product" refers to all changes of business activities with regard to market coverage, customer reach, products, and services.
- **Participations:** Participations are part of the annual risk register and are included as a shareholder / participation risk under the credit risk and taken into account in the CVaR exposure. Risk monitoring is performed during the year, including a notification obligation for the participations.
- **Monitoring of unusual and non-transparent business activities:** Unusual or non-transparent business activities are defined as business activities carried out by means of especially designated legal entities or in areas with deficits in transparency or which do not meet international banking standards. The whistleblowing and risk reporting systems set up at the Bank ensure that such transactions are reported to the compliance function. Reports of unusual or non-transparent transactions are immediately forwarded to the risk control function. It examines whether the risks resulting from the reported business activities are controlled by the procedures available to the Bank and can therefore be adequately managed and gives its opinion on risk assessment and compatibility with the risk strategy.

**Crisis Management:** A Crisis Task Force is convened in the event of a critical situation consisting of the Members of the Executive Management Board together with relevant department heads and their deputies. The Crisis Task Force will take all the necessary actions required to respond to an internal/external critical incident that could impact the EDB's image or operational capacity. This applies, in particular to security issues, business interruptions and financial and reputational risks. Its role is to assess the impact of the critical situation, to establish the necessary business continuity measures, and to issue appropriate instructions.

Based on the quality of the work carried out by the risk management function and in compliance with the provisions laid down in this regard, the Board of Directors considered the relationship between the risks incurred and the ability to manage these risks having regard to the existing own funds and liquidity to be balanced. The Board of Directors approved also the measures taken and recommendations made in order to mitigate the risks identified by the risk control function.

## 2. Key metrics

(Article 447 CRR)

The Bank's key metrics are reflected in the below template.

### Template EU KM1 – Key metrics template

EUR		T 2023	T-1 2022
<b>Available own funds (amounts)</b>			
1	Common Equity Tier 1 (CET1) capital	63,787,984	60,666,116
2	Tier 1 capital	63,787,984	60,666,116
3	Total capital	63,787,984	60,666,116
<b>Risk-weighted exposure amounts</b>			
4	Total risk exposure amount	289,118,522	284,703,326
<b>Capital ratios (as a percentage of risk-weighted exposure amount)</b>			
5	Common Equity Tier 1 ratio (%)	22.06%	21.31%
6	Tier 1 ratio (%)	22.06%	21.31%
7	Total capital ratio (%)	22.06%	21.31%
<b>Additional own funds requirements to address risks other than the risk of excessive leverage (as a percentage of risk-weighted exposure amount)</b>			
EU 7a	Additional own funds requirements to address risks other than the risk of excessive leverage (%)	5.00%	5.00%
EU 7b	<i>of which: to be made up of CET1 capital (percentage points)</i>	2.25%	2.81%
EU 7c	<i>of which: to be made up of Tier 1 capital (percentage points)</i>	3.00%	3.75%
EU 7d	Total SREP own funds requirements (%)	12.00%	13.00%
<b>Combined buffer and overall capital requirement (as a percentage of risk-weighted exposure amount)</b>			
8	Capital conservation buffer (%)	2.50%	2.50%
EU 8a	Conservation buffer due to macro-prudential or systemic risk identified at the level of a Member State (%)		
9	Institution specific countercyclical capital buffer (%)	0.41%	0.33%
EU 9a	Systemic risk buffer (%)		
10	Global Systemically Important Institution buffer (%)		
EU 10a	Other Systemically Important Institution buffer (%)		
11	Combined buffer requirement (%)	2.91%	2.83%
EU 11a	Overall capital requirements (%)	14.91%	15.83%
12	CET1 available after meeting the total SREP own funds requirements (%)	13.06%	11.56%
<b>Leverage ratio</b>			
13	Total exposure measure	1,515,846,765	1,781,318,18
14	Leverage ratio (%)	4.21%	3.41%

16	Total net cash outflows (adjusted value)	680,486,860	749,435,264
17	Liquidity coverage ratio (%)	148.91%	171.23%
<b>Net Stable Funding Ratio</b>			
18	Total available stable funding	495,935,063	536,337,416
19	Total required stable funding	178,851,661	152,813,709
20	NSFR ratio (%)	277.29%	350.97%

### 3. Own funds and capital adequacy

#### 3.1. Own funds composition

(Article 437 CRR)

In accordance with Article 92 (1) CRR the Bank is obliged to maintain sufficient own funds at all times. As per 31 December 2023, EDB's total own funds consist solely of Common Equity Tier 1 capital (hereafter "CET1") which is comprised of subscribed capital, share premium, retained earnings and reserves. Deductions from CET1 arise from intangible assets, value adjustments due to the requirements for prudent valuation as well as CET1 instruments of financial sector entities on which EDB has a significant investment. The following table illustrates the Bank's own funds composition as at 31 December 2023.

#### Template EU CC1 – Composition of regulatory own funds

EUR		(a)	
		Amounts	
<b>Common Equity Tier 1 (CET1) capital: instruments and reserves</b>			
1	Capital instruments and the related share premium accounts	42,000,000	CC2-18 and CC2-19
	<i>of which: shares, fully paid up</i>	13,000,780	CC2-19
	<i>of which: share premium</i>	28,999,220	CC2-18
2	Retained earnings	49,288,914	CC2-20 and CC2-21
3	Accumulated other comprehensive income (and other reserves)	3,856,459	CC2-20 and CC2-21
EU-3a	Funds for general banking risk		
4	Amount of qualifying items referred to in Article 484 (3) CRR and the related share premium accounts subject to phase out from CET1		
5	Minority interests (amount allowed in consolidated CET1)		
EU-5a	Independently reviewed interim profits net of any foreseeable charge or dividend		
<b>6</b>	<b>Common Equity Tier 1 (CET1) capital before regulatory adjustments</b>	<b>95,145,373</b>	
<b>Common Equity Tier 1 (CET1) capital: regulatory adjustments</b>			
7	Additional value adjustments (negative amount)	-664,349	
8	Intangible assets (net of related tax liability) (negative amount)	-6,136,546	CC2-7
10	Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability where the conditions in Article 38 (3) CRR are met) (negative amount)		
11	Fair value reserves related to gains or losses on cash flow hedges of financial instruments that are not valued at fair value		
12	Negative amounts resulting from the calculation of expected loss amounts		
13	Any increase in equity that results from securitised assets (negative amount)		
14	Gains or losses on liabilities valued at fair value resulting from changes in own credit standing		
15	Defined-benefit pension fund assets (negative amount)		
16	Direct, indirect and synthetic holdings by an institution of own CET1 instruments (negative amount)		

17	Direct, indirect and synthetic holdings of the CET 1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)		
18	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)		
19	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	-24,556,495	
EU-20a	Exposure amount of the following items which qualify for a RW of 1250%, where the institution opts for the deduction alternative		
EU-20b	<i>of which: qualifying holdings outside the financial sector (negative amount)</i>		
EU-20c	<i>of which: securitisation positions (negative amount)</i>		
EU-20d	<i>of which: free deliveries (negative amount)</i>		
21	Deferred tax assets arising from temporary differences (amount above 10% threshold, net of related tax liability where the conditions in Article 38-(3) CRR are met) (negative amount)		
22	Amount exceeding the 17,65% threshold (negative amount)		
23	<i>of which: direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities</i>		
25	<i>of which: deferred tax assets arising from temporary differences</i>		
EU-25a	Losses for the current financial year (negative amount)		
EU-25b	Foreseeable tax charges relating to CET1 items except where the institution suitably adjusts the amount of CET1 items insofar as such tax charges reduce the amount up to which those items may be used to cover risks or losses (negative amount)		
27	Qualifying AT1 deductions that exceed the AT1 items of the institution (negative amount)		
27a	Other regulatory adjustments		
<b>28</b>	<b>Total regulatory adjustments to Common Equity Tier 1 (CET1)</b>	<b>-31,357,389</b>	
<b>29</b>	<b>Common Equity Tier 1 (CET1) capital</b>	<b>63,787,984</b>	
<b>Additional Tier 1 (AT1) capital: instruments</b>			
30	Capital instruments and the related share premium accounts		
31	<i>of which: classified as equity under applicable accounting standards</i>		
32	<i>of which: classified as liabilities under applicable accounting standards</i>		

33	Amount of qualifying items referred to in Article 484 (4) CRR and the related share premium accounts subject to phase out from AT1		
EU-33a	Amount of qualifying items referred to in Article 494a(1) CRR subject to phase out from AT1		
EU-33b	Amount of qualifying items referred to in Article 494b(1) CRR subject to phase out from AT1		
34	Qualifying Tier 1 capital included in consolidated AT1 capital (including minority interests not included in row 5) issued by subsidiaries and held by third parties		
35	<i>of which: instruments issued by subsidiaries subject to phase out</i>		
<b>36</b>	<b>Additional Tier 1 (AT1) capital before regulatory adjustments</b>		
<b>Additional Tier 1 (AT1) capital: regulatory adjustments</b>			
37	Direct, indirect and synthetic holdings by an institution of own AT1 instruments (negative amount)		
38	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)		
39	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)		
40	Direct, indirect and synthetic holdings by the institution of the AT1 instruments of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)		
42	Qualifying T2 deductions that exceed the T2 items of the institution (negative amount)		
42a	Other regulatory adjustments to AT1 capital		
<b>43</b>	<b>Total regulatory adjustments to Additional Tier 1 (AT1) capital</b>		
<b>44</b>	<b>Additional Tier 1 (AT1) capital</b>		
<b>45</b>	<b>Tier 1 capital (T1 = CET1 + AT1)</b>	<b>63,787,984</b>	
<b>Tier 2 (T2) capital: instruments</b>			
46	Capital instruments and the related share premium accounts		
47	Amount of qualifying items referred to in Article 484(5) CRR and the related share premium accounts subject to phase out from T2 as described in Article 486(4) CRR		
EU-47a	Amount of qualifying items referred to in Article 494a(2) CRR subject to phase out from T2		
EU-47b	Amount of qualifying items referred to in Article 494b(2) CRR subject to phase out from T2		
48	Qualifying own funds instruments included in consolidated T2 capital (including minority interests and AT1 instruments not included in rows 5 or 34) issued by subsidiaries and held by third parties		
49	<i>of which: instruments issued by subsidiaries subject to phase out</i>		
50	Credit risk adjustments		
<b>51</b>	<b>Tier 2 (T2) capital before regulatory adjustments</b>		

<b>Tier 2 (T2) capital: regulatory adjustments</b>			
52	Direct, indirect and synthetic holdings by an institution of own T2 instruments and subordinated loans (negative amount)		
53	Direct, indirect and synthetic holdings of the T2 instruments and subordinated loans of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)		
54	Direct, indirect and synthetic holdings of the T2 instruments and subordinated loans of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)		
55	Direct, indirect and synthetic holdings by the institution of the T2 instruments and subordinated loans of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)

## 3.2. Capital adequacy

### **(Article 438 CRR)**

The Bank applies the Standardised Approach in accordance with Part Three, Title II, Chapters 2 and 4 CRR for the calculation of own funds requirements for credit risk set out in Article 92 (3) point (a) CRR. In this context, the Financial Collateral Comprehensive Method (hereafter "FCCM") is used to mitigate credit risks to which the bank is exposed. With regards to counterparty credit risk related to derivative exposures, EDB applies the Original Exposure Method (hereafter "OEM") in accordance with Article 282 CRR. Credit valuation adjustments (hereafter "CVA") for OTC derivatives are further measured using the Standardised Approach in line with Article 384 CRR. The Basic Indicator Approach (hereafter "BIA") is applied for the calculation of own funds requirements for operational risk set out in Article 315 CRR.

### **Table EU OVC – ICAAP information**

On the basis of Circular CSSF 07/301 (as amended), as supplemented by Circulars CSSF 08/338 (as amended), CSSF 09/403, CSSF 11/506 (as amended), CSSF 12/552 (as amended), CSSF 12/537, CSSF 12/538, CSSF 13/574, CSSF 14/597 and CSSF 16/647, EDB is required to perform an Internal Capital and Liquidity Adequacy Assessment Process in order to determine the adequacy of its internal capital and liquidity. Pursuant to the said Circular, the Bank's Executive Management Board informs the management body in its supervisory function on the institution's situation and management of risks and its internal, current and planned capital and liquidity on the situation and the management of risks, internal and regulatory capital and liquidity at least once a year.

The ICAAP serves to receive a closed picture of the risk profile of the Bank and to provide a systematic analysis of risks, which endanger the existence of the Bank or can have a negative influence on its development in the future.

In the light of the Bank's ICAAP, risks not fully covered by the minimum regulatory own funds requirements are addressed.

In this context, the adequacy of the internal capital and the constant safeguarding of the institution's liquidity are paramount for ensuring its solvability. The ICAAP must be designed in such a way as to assess to what extent its internal capital and liquidity is adequate to cover all the risks to which it is or might be exposed. The ICAAP, thus, supplements the regulatory stipulated coefficients (e.g. Capital Adequacy Ratio). Concerning the completeness of the risks, these objectives result from the claim to secure the Bank's continued existence with always adequate capital and comfortable liquidity.

The Bank ensures under the supervision of the Accounting & Regulatory Reporting department that its capital ratios are at all times compliant with the following objectives:

- Regulatory requirements are met;
- Risk Appetite targets are respected;
- Financial flexibility is given within RWA allocation; and
- Resilience is maintained in the event of stress.

3	Institution specific countercyclical capital buffer requirement	1,174,526

### 3.3. Leverage ratio

(Article 451 CRR)

#### Table EU LRA – Disclosure of LR qualitative information

The leverage ratio is a measure which allows for the assessment of an institutions' exposure to the risk of excessive leverage.

EDB calculates and manages its leverage ratio in accordance with Part 7 CRR. In this context, managing the Bank's risk of excessive leverage means both calibrating its Tier 1 capital measure (leverage ratio nominator) and monitoring its exposure measure (leverage ratio denominator) on a daily basis. Whereas on-balance sheet exposures represent the biggest component of EDB's leverage ratio denominator, off-balance sheet exposures and derivative positions are also considered for the determination of the Bank's exposure measure. The Bank's leverage exposures are actively managed by the departments Sales & Treasury and Credit. The Accounting and Regulatory Reporting department is in charge of the monitoring and calibration of the leverage ratio. Target is to maintain an internally defined leverage ratio level which is set well above the minimum requirement of 3% in accordance with Article 92 (1) (d) CRR. The respective leverage ratio levels are reported daily to the Bank's Executive Management Board and Board of Directors.

The Bank's leverage exposures are primarily influenced by the volume of its client deposits. More precisely, the main trigger for the leverage ratio constitutes the client behaviour – the deposits received are kept at BCL or reinvested predominately in short-term high quality liquid assets on the market.

As at 31 December 2023, EDB maintained a leverage ratio of 4.21%.

## 4. Credit risk

### 4.1. Credit risk management

*(Article 435 (1) (a), (b), (d) and (f) CRR)*

#### **Table EU CRA – General qualitative information about credit risk**

Credit risk defines the risk of loss of assets as a result of partial or complete default of asset positions with different characteristics in the form of counterparty, settlement, issuer, investment and shareholder as well as country risk. Credit risk comprises receivables and credit equivalents from customers and banks as well as securities receivables from issuers. The lending business is an activity complementary to the bank's core business.

To mitigate and control credit risks, the Bank has specified limits, in place for money market transactions, foreign currency transactions, securities and derivative transactions.

In accordance with the credit risk strategy, the Bank's lending business focuses on Lombard loans for external managed private customers with assets deposited with the Bank and short-term loans to investment funds, for which EDB has the depositary bank function. Regularly assessed collaterals are an important instrument for minimising risk.

The Bank considers its foreign currency loans defined in the Circular CSSF 12/538 and the related risks to be insignificant in view of the low proportion of non-currency congruent collateralised foreign currency loans in the balance sheet total and in view of the intended monitoring of systemic risks as originating from the Circular. The mandatory requirements of the Circular are implemented by the binding organisational instructions in the Bank's internal policies.

For the Bank's holdings in interest-bearing securities, it observes issuer limits as well as the list of approved products. New investments focus on securities exempt from regulatory own funds requirements due to their creditworthiness and German covered bonds. A further selection criterion is the eligibility for refinancing at the ECB, especially for EUR denominated securities.

The Credit Risk Management team prepares a regular report of exposures (counterparty default risk report) that are overdrawn and/or have a lending value shortfall. The report also includes all doubtful receivables, overdrafts of issuers, overdraft of country limits and overdrafts of risk limits set for shadow banking entities.

Continuous credit monitoring is carried out by the responsible customer advisor and the Credit Risk Management team in order to identify changes in the credit rating in a timely manner. The Credit Risk Management team monitors compliance with the competences and the timely repayment of overdrafts on an ongoing basis and reports this as part of the allocation of competences. In addition, the exposures are monitored daily for collateral value shortfall, with any underfunding re-reported as part of the competence allocation and communicated to the Chief Risk Officer, once the internally defined threshold values are reached.

Unexpected losses, i.e. losses exceeding the expected amount, are measured against this limit. Furthermore, a surcharge for migration risks is applied to the limit resulting from the selected method as part of the risk-bearing capacity approach. In principle, all positions with counterparty risk are included in the portfolio analysis when determining CVaR. The unexpected loss is defined by the CVaR as the 99.5% quantile of the loss distribution of the Bank's credit portfolio. The migration risk surcharge is calculated as the difference between the expected loss of the actual portfolio and the expected loss of the actual credit portfolio of all borrowers under stressed conditions. The calculation is carried out using the internal credit risk model, into which the unsecured portions and default probabilities of the individual borrowers as well as correlations (via an industry / sector classification) flow. In addition, a central additional condition is that the regulatory limitation of capital requirements regulation must always be complied with.

## 4.2. Credit exposure

(Articles 442 and 444 CRR)

### **Table EU CRD – Qualitative disclosure requirements related to standardised approach**

The Bank applies the Standardised Approach in accordance with Part Three, Title II, Chapters 2 and 4 CRR to determine its own funds requirements for credit risk set out in Article 92 (3) point (a) CRR.

The Standardised Approach assigns standardised risk weights based on external ratings given by eligible External Credit Assessment Institutions (hereafter “ECAI”) as per Part Three, Title 2, Chapter 2, Section 3 CRR. Under the Standardised Approach, the external credit assessments assigned by the nominated ECAI Standard & Poor’s (hereafter “S&P”) are used by the Bank for the exposure classes central governments or central banks, regional governments or local authorities and public sector entities. Where no external credit assessment is available, the Bank assigns the specific predefined risk weights as per CRR.

In line with Commission Implementing Regulation (EU) 2016/1799, the following table depicts the mapping of the long-term S&P external credit assessments to credit quality steps, the latter being relevant for the Bank’s determination of risk weights.

<b>S&amp;P credit assessment</b>	<b>Mapping to credit quality steps</b>
AAA to AA-	1
A+ to A-	2
BBB+ to BBB-	3
BB+ to BB-	4
B+ to B-	5
CCC+ and below	6

As at 31 December 2023, the Bank did not have any non-performing or forborne exposures. Since the Bank further does not constitute a large institution, the following disclosure requirements do not apply:

- Template EU CR2a – Changes in the stock of non-performing loans and advances and related net accumulated recoveries
- Template EU CQ1 – Credit quality of forborne exposures
- Template EU CQ2 – Quality of forbearance
- Template EU CQ6 – Collateral valuation - loans and advances
- Template EU CQ7 – Collateral obtained by taking possession and execution processes
- Template EU CQ8 – Collateral obtained by taking possession and execution processes – Vintage breakdown

### 4.3. Credit risk mitigation techniques

(Article 453 CRR)

**Table EU CRC – Qualitative disclosure requirements related to CRM techniques**

The Bank applies the Financial Collateral Comprehensive Method in accordance with Article 223 CRR and considers only eligible collateral meeting the conditions set out in Articles 197 and 198 CRR, respectively.

As at 31 December 2023, the Bank used the following eligible collateral as credit risk mitigation techniques:

- Cash on deposit or cash on accounts;
- Margins relating to derivative transactions; and
- Debt securities.

No further collateral like immovable property, receivables, leasing, other physical collateral, guarantees or any types of credit derivatives are in use. Moreover, EDB does not apply on- or off-balance sheet netting. The Credit Risk department is in charge of the monitoring, evaluation and management of eligible collateral.

EDB used FlexFinance (Fernbach) and ABACUS360 (Regnology) as supporting application to manage valuations and eligibility of collateral.

**Template EU CR3 – CRM techniques overview – Disclosure of the use of credit risk mitigation techniques**

## 4.4. Counterparty credit risk

*(Article 439 CRR)*

### **Table EU CCRA – Qualitative disclosure related to CCR**

Counterparty credit risk (hereafter “CCR”) is the risk arising from the possibility that a counterparty to a transaction may default before the final settlement of the transaction's cash flows.

For exposures that give rise to counterparty credit risk (i.e. OTC derivatives) the Bank applies the Original Exposure Method (hereafter “OEM”) in accordance with Article 282 CRR in order to determine its RWA.

For the limitation of risks in connection with market activities, the Bank has specified internal limits for counterparty credit risk which are a component of the counterparty and the related group's overall credit limit. Those counterparty credit limits are granted with regards to money market transactions, foreign currency transactions, securities and derivative transactions after consideration of the characteristics of transactions eligible under these limits and the assessment of the overall credit quality of the counterparty. The limits are subject to annual approval and monitoring involving the Board of Directors. Within the framework of a credit-value-at-risk model, unexpected losses, quantified in monetary terms, are calculated on the basis of unsecured portions of the debt, the likelihood of the counterparty defaulting, taking into account recovery factors for public borrowers (sovereigns; other public entities) and for banks, and the relevant correlations.

EDB did not apply any netting agreements for regulatory purposes and did not have any credit derivatives exposures.

## 4.5. Asset encumbrance

*(Article 443 CRR)*

### **Table EU AE4 – Accompanying narrative information**

An asset shall be treated as encumbered where it has been pledged or is subject to any form of arrangement to secure, collateralize or credit enhance any transaction from which it cannot be freely withdrawn.

Encumbrance at EDB mainly arises from collateralising movements of market values stemming from derivative transactions.

The figures related to the Bank's encumbrance reflected in the templates below correspond to the median of 2023 quarterly values. The totals correspond to the median of total values and are consequently not equal to the sum of the medians of sub-components.

## 5. Market risk

### 5.1. Market risk management

(Article 435 CRR)

#### **Table EU MRA – Qualitative disclosure requirements related to market risk**

As per 31 December 2023, EDB continued its activities as a non-trading book institution.

Market risk is the risk of losses arising from adverse movements in market prices (interest rates, exchange rates, stock and commodity prices). Market risks result from price changes in securities held in the Bank's own holdings portfolio as well as open foreign exchange positions and the negative effects of changes in the interest rate structure as part of maturity transformation. Market risk under Pillar II of the Basel Accord includes interest rate risk in the banking book (hereafter "IRRBB"), and mainly refers to the negative impact caused by interest rate changes on a bank's net interest income or on the value of its equity (please refer to Chapter 5.3).

The following types of transactions are processed in money market and foreign exchange trading:

- Money market transactions;
- Spot foreign exchange transactions;
- Foreign exchange forwards;
- Currency swaps; and
- Other financial instruments.

In order to limit the market price risks associated with the Bank's portfolio, a Value-at-Risk (hereafter "VaR") method based on a Monte Carlo simulation is applied by the Bank.

For the daily management and monitoring of the potential market price risks, the VaR calculation is based on a confidence interval of 99% and a holding period of 1 day (standard VaR). For the purposes of capital management, the risk-bearing capacity, a conversion to the 99.5% quantile and a holding period of 60 days is applied. The VaR is calculated for the total portfolio and for the individual sub-portfolios. Additional alarm thresholds in the form of a traffic light system are implemented for the purpose of monitoring the VaR limit utilisations.

To assess the forecast quality of the risk model, the Bank uses a so-called clean back testing procedure, which calculates the current Mark to Market value for positions of the previous day and compares this value with the risk calculated on the previous day. In this case, the back-testing are examined, and where back testing failures rated as outliers are not taken into account.

Risk limits are in place to limit the market risk exposures. Apart from the VaR, negative Mark-to-Market results accumulated in the course of the year also lead to a reduction of the open/unused limit, with the objective that potential losses in the current financial year are limited to the approved risk limits.

In addition to the regulatory IRRBB stress test, several other stress tests are carried out on a quarterly basis and are integrated in the quarterly risk report. These contain sensitivity analyses, each with different parameters for share price risk, foreign currency risk and interest rate risk, with both directions of change being examined (e.g. rising and falling prices). In addition, several hypothetical and historical scenarios are examined, based on stress situations that have occurred in the past.

As EDB is an institution without material trading activity, the Bank was only subject to own funds requirements for foreign exchange risk and hence does not have any reportable items under the following disclosure tables and templates:

- Table EU MRB – Qualitative disclosure requirements for institutions using the internal Market Risk Models
- Template EU MR2-A – Market risk under the internal Model Approach (IMA)
- Template EU MR2-B – RWEA flow statements of market risk exposures under the IMA
- Template EU MR3 – IMA values for trading portfolios
- Template EU MR4 – Comparison of VaR estimates with gains/losses
- Template EU PV1 – Prudent valuation adjustments (PVA)

## 5.3. Interest rate risk in the banking book (IRRBB)

(Article 448 CRR)

### Table EU IRRBBA – Qualitative information on interest rate risks of non-trading book activities

The Bank defines interest rate risk as the loss risk from non-congruent refinancing in the banking book, if interest rate structure changes. The IRRBB arise from potential losses due to unfavourable fluctuations in interest rates.

The IRRBB as part of the market price risk is taken into account and controlled accordingly with the aim of an efficient management of earnings opportunities.

An interest maturity of one day is assumed for items with an indefinite contractual interest rate fixation, which thus represents both the average and the longest period for interest rate adjustments.

In order to comply with the Luxembourgish requirements, as amended by the Circular CSSF 24/848, the Bank assesses the impact of the interest rate risk, in form of a sudden interest rate shift of +/- 200 basis points (parallel shift), according to paragraph 92 lit. c of EBA/GL/2022/14, as well as the other prescribed six stress scenarios with currency specific parameterizations, on the interest-bearing net positions of the banking book on the economic value of the equity (EVE) and on the net interest income (NII), on a quarterly basis. The results are submitted to the CSSF annually by 31 December and by the end of the quarter. Furthermore, the results are evaluated against the thresholds set out in the EBA Guidelines which define a threshold of 15% of Tier 1 Capital for change in economic value of equity and 2.5% of Tier 1 Capital for net interest income impact.

The change in EVE is calculated at minimum for each currency where the assets or liabilities denominated in that currency amount to 5% or more of the total non-trading book financial assets.

In addition, historical and hypothetical interest rate scenarios are explored, which are based on stress situations that have occurred in the past.

6	Short rates down	1,700,798	1,489,292		

## 6. Liquidity risk

### 6.1. Liquidity risk management

*(Article 451a (4) CRR)*

#### **Table EU LIQA – Liquidity risk management**

Liquidity risk is defined as the risk that the Bank will be unable to meet its payment obligations in full and at all times. The Bank's liquidity shortage may be triggered by the consequences of a default risk and/or maturity mismatch arising from a negative deviation between expected and actual date of a cash inflow.

The Bank's liquidity risk is managed under the strict condition of adhering to the Liquidity Coverage Ratio (hereafter "LCR"), Net Stable Funding Ratio (hereafter "NSFR") and internal liquidity maturity mismatch limits.

Liquidity management is the responsibility of the Sales & Treasury department. It analyses known and expected cash flows and uses these to devise liquidity planning while always taking into account compliance with the regulatory and internal liquidity principles. The cash inventories must be managed in such a way that the expected cash outflows are always offset by sufficient cash inflows.

In the framework of the ILAAP provisions, Risk Controlling has implemented a liquidity monitoring procedure. In addition, the liquidity risk is also analysed within the risk register assessment.

Liquidity management planning is monitored by means of a daily gap analysis by the Risk Controlling department. The liquidity maturity statements take into account, in addition to all balance sheet items and the irrevocable loan commitments and guarantees provided, also the repayment flows from derivatives.

At the end of each month, historical, hypothetical and inverse stress tests are carried out, which simulate the liquidity position in extreme situations in order to identify possible liquidity concerns. In order to carry out inverse stress tests, the extent to which negative effects of the risk driver – deposit outflow, collapse of prices of eligible securities and drawing of open commitments – would lead to insolvency on the following day. This is simulated for the individual risk drivers on the basis of extreme scenarios and for mixed scenarios.

The aim is to ensure that the Bank remains liquid for at least one month in a stress scenario.

The results of all stress tests within the daily report for end of month, the members of the Board of Directors as part of the quarterly risk report. In addition, the Executive Management Board is informed about the daily balance sheet and the LCR as a key figure of the liquidity coefficients in a separate report, provided by the Accounting department.

In liquidity crises, it is particularly important for the Bank to be able to implement problem-solving processes and measures quickly and effectively. To this end, the Bank has developed and approved a liquidity emergency plan.

The Bank's management bodies have approved that the liquidity risk management system is adequate with regards to EDB's profile and strategy. Liquidity risk is part of the risk management framework and is considered in Risk Appetite statements of the Bank.

## 6.2. Regulatory liquidity ratios

*(Article 451a (2) and (3) CRR)*

### **Table EU LIQB – On qualitative information on LCR, which complements Template EU LIQ1**

The Liquidity Coverage Ratio (LCR) promotes the short-term resilience of a bank's liquidity risk profile by ensuring that a bank has an adequate stock of unencumbered high-quality liquid assets (HQLA) that can be converted into cash easily and immediately in private markets to meet its liquidity needs for a 30 calendar day liquidity stress scenario. The regulatory requirements are laid down in Part 6 CRR in connection with Commission Delegated Regulation (EU) 2015/61.

At EDB, the LCR is calculated and monitored on a daily basis and the Bank has set internal limits as part of the risk appetite for the LCR, lying well above the regulatory minimum requirement of 100% in order to counteract any negative developments at an early stage.

In line with Article 415 (2) CRR, the Bank publishes liquidity reports separately in its reporting currency EUR as well as in each currency amounting to or exceeding 5% of the Bank's total liabilities on the respective reporting date, excluding own funds and off-balance sheet items. Throughout the year 2023, EDB calculated and reported its liquidity reports mainly in EUR, USD and GBP.

In 2023, the Bank's LCR met the regulatory minimum requirement at all times. More precisely, EDB's average LCR for the four quarters ranged from 142% to 187% during the year 2023. Decisive for the Bank's comfortable liquidity balances is the high level of BCL reserves, the stock of own unencumbered securities as well as the high volume of stable deposits.

## 7. Operational risk

*(Articles 435 (1) and 446 CRR)*

### **Table EU ORA – Qualitative information on operational risk**

Operational risk is defined as the potential loss resulting from the inadequacy or failure of internal procedures, people and systems or as a result of external events. It includes legal and compliance risks.

The Bank applies the Basic Indicator Approach (hereafter “BIA”) for the calculation of own funds requirements for operational risk in accordance with Article 315 CRR. In line with this approach, the Bank’s capital requirements for operational risk are determined as 15% of the average over three years of the relevant indicator set out in Article 316 CRR.

The Bank addresses operational risks by clearly defined competences and responsibilities. The identification, containment and avoidance of operational risks is carried out by continuously reviewing all essential work processes, competences and responsibilities across the Bank. Strict adherence to the principle of segregation of functions at all levels of the Bank, includes internal controls and approvals, integrated into workflows and technical systems are constituting important aspects of the risk mitigation. By maintaining a Business Recovery Centre and setting up backup workstations, including enabling the staff to work from home, the Bank has taken precautionary measures to mitigate the risks associated with an IT failure, the unavailability of an office building and pandemics. In order to maintain a high level of availability and performance of the systems, the Bank also continuously invests in the IT infrastructure. These measures are accompanied by insurance policies (e.g. electronics insurance or small machinery insurance).

Legal risks are countered by the Bank through an extensive use of standardized contracts, the review and update of individual contracts on a regular basis as applicable, according to the prevailing legislation and business practices, with recourse being had for this to the expertise of external legal advisers.

The Bank continuously improves the range of instruments designed to combat money laundering, the financing of terrorism and white-collar crime. In this context all employees receive regular trainings on the prevention of money laundering and the financing of terrorism as well as training on fraud prevention. For the purpose of risk transfer, the Bank has concluded insurance policies, in order to reduce operational risk, for which the Bank could be held liable under statutory liability provisions. The Bank has taken out a Professional Indemnity, D&O and comprehensive crime insurance policies, which serve to provide coverage for claims for damages arising from the operating business or for the company managers against financial losses.

The Risk Control & Self-Assessment as part of the Risk Register is the central element for the assessment of operational risks in EDB. The assessment of the residual risk, i.e. after taking into account the key controls, provides the parameters the operational risk quantification. To calculate the potential damage, a value-at-risk for operational risks is calculated using a Monte-Carlo simulation. The internal model applied is the loss distribution approach, combining the results of the Risk Register assessment with stochastic actuarial distribution assumptions. Operational risk is understood as the 99.5% quantile of the distribution of possible losses incurred by the Bank based on operational events within one year. This defines the value-at-risk of operational risks to which a corresponding risk capital is allocated. In addition, a stress test is calculated that assumes a higher correlation between the operational events.

In order to manage risk, measures are defined for reporting incidents and issues. In addition, risk management measures can be adopted by the EDB’s Committees, as operational events are discussed at the regular meetings. Additional alarm thresholds for operational risk are in place within the framework of the risk-bearing capacity.

Regarding legal and reputational risk, the Bank has its own Legal department. Externally, the Bank is advised and represented by lawyers based in Luxembourg. In order to identify legal risks at an early stage, The Bank has set up a complaint management system within the meaning of CSSF Regulation No. 16-07. The complaints management system provides, among other things, the possibility to escalate cases of complains to the CSSF and monitoring their careful and prompt processing by the appointed complaints manager.

The Bank’s management bodies have approved that EDB’s operational risk management system is adequate and in line with its internal profile and strategy.

## 8. Risks arising from securitisations

*(Article 449 CRR)*

The Bank does not engage in securitisation activities and therefore does not have any reportable items under the respective disclosure templates related to securitisation exposures (EU SEC1 to EU SEC5).

## 9. Environmental, social and governance risks

*(Article 449a CRR)*

In accordance with Article 449a CRR in conjunction with Commission Implementing Regulation (EU) 2022/2453, large institutions which have issued securities that are admitted to trading on a regulated market of any Member State shall disclose information on environmental, social and governance risks (hereafter “ESG”), including physical and transition risks.

While neither qualifying as large institution nor issuing securities admitted to trading on regulated markets, EDB is well aware of the growing importance of ESG risks and has developed an effective strategy to deal with such.

To this end EDB has implemented an Environment and Climate Policy, which sets out the goals, commitments and framework for environmental and climate risks at EDB. Its purpose is to define how these risks are taken into account in of the Bank’s business conduct and decisions.

According to CSSF Circular 21/773 on Climate and Environmental Risk the Bank regularly performs a Materiality Assessment of climate-related and environmental Risks in its business to identify where near-term and long-term risks may arise. The goal of the Materiality Assessment is to evaluate impact and exposure of the Bank’s climate risk arising from the Bank’s activities and the resulting material risks. The materiality is evaluated for a short-, mid- and long-term period taking in account the physical and transition nature of climate related risks. As overall result, climate-related and environmental risk are classified as non-material.

ESG metrics are the three central themes for measuring the sustainability and positive impact of an investment or business. Being part of the Apex Group EDB’s purpose as a business is to drive sustainable change for future generations. It is recognized that all private companies and individuals have a responsibility to take immediate action to understand and reduce our impact on the environment. In that context, the group has installed a Sustainability Committee which meets regularly and is comprised of both senior stakeholders and employee elected representatives – their mission is to drive progressive change within the business and to have a positive impact on People, Planet and Society is installed.

EDB recognises that climate change presents opportunities as well as risks. The Bank intends to adapt its Business Strategy as needed to further support the climate targets of the Apex group and to support its clients and counterparties in their transition to a more sustainable and green economy.

With regard to our clients, ESG Ratings and Advisory service of the group helps investors unlock real value and drive transformational change by offering a high quality, global, independent, end-to-end service for the private markets. By deploying intelligent ESG data and insights we aim to drive capital towards ESG performance while influencing significant behavioural change.

## 10. Remuneration

*(Article 450 CRR)*

### **Table EU REMA – Remuneration Policy**

EDB has in place a Remuneration Policy that is accessible to all staff members of the Bank through publication in the Organizational Handbook enabling them to understand the criteria used to determine their remuneration. The Remuneration Policy is acknowledged by the specialised Appointments & Remuneration Committee of the Board of Directors as well as approved by the Board of Directors. The Policy has been further shared with the CSSF according to the statutory guidelines. EDB's Remuneration Policy is adhering to the principle of effective risk management and sound business practices in line with the strategy, objectives, values and long-term interests of the Bank. The Remuneration Policy is published on EDB's website.

The Policy's scope comprises alignment of incentives for employees with the Bank's long-term objectives, risk appetite and overall performance.

It also seeks to attract, retain, and motivate talented individuals regardless of gender, ethnicity, age, disability or any other factors unrelated to performance, skills and experience, while ensuring that the Bank's remuneration practices comply with applicable laws, regulations and best practices on the market.

The roles and responsibilities regarding the Remuneration Policy and operating effectiveness of remuneration activity within the Bank are assigned to different levels of responsibility within the organisation:

#### **Board of Directors**

The Board of Directors establishes the general principles governing EDB's Remuneration Policy and ensures it is appropriately implemented and aligned with the governance framework, culture, risk appetite and the Bank's (risk-taking) strategy.

The Board of Directors, in prior consultation with Apex Group, sets the remuneration of the members of the Executive Management Board of EDB, approves bonus and incentive payments following the rules implemented in the Policy (in particular for Identified Staff & Material Risk Takers).

#### **Appointments & Remuneration Committee**

In line with the regulatory framework and in view of EDB's organizational structure, the Bank has established the specialised Appointments & Remuneration Committee of the Board of Directors.

The role of the Committee, as a specialized Committee of the Board, is to assist and advise the Board in all analyses and decisions related to appointments and remuneration that have an impact on risk and risk management.

The Appointments & Remuneration Committee is involved in the performance of risk assessments in which objectives of the Bank, business units and staff deriving from EDB's business and risk strategy, corporate culture and values (including equal treatment and gender neutrality), risk appetite (including ESG risks) and long-term interests are considered.

This Committee further oversees proportionality assessment of the Bank, assessment of the Identified Staff and remuneration of the Identified Staff & Material Risk Takers.

The Committee is constituted in a way that enables it to exercise competent and to provide independent judgment on the remuneration policies, practices as well as the incentives created for managing risks.

The Appointments & Remuneration Committee is responsible for scrutinising the design and the monitoring of the implementation of the Remuneration Policy in compliance with legislation and regulations. It has a supervisory role in the remuneration practice and in the related decision making process.

## **Executive Management Board and its internal EMB Committees**

Notwithstanding the fact that the overall responsibility for the Policy remains with the Board of Directors, it is important to note the active role of the Executive Management Board. The latter shall ensure the operational implementation of the Policy and shall take appropriate measures to facilitate a compliant application of the Policy.

### **Human Resources**

The Human Resources function is the ultimate owner of this Policy and its implementation follow-ups. Human Resources shall participate in developing and evaluating the Bank's Remuneration Policy, including the remuneration structure, remuneration levels and incentive schemes, in a way to not only attract and retain the staff the Bank needs, but also assuring that the Remuneration Policy is aligned with EDB's risk profile.

Human Resources is also in charge of the procedures and the involved processes or practices in line with the Remuneration Policy and shall coordinate the periodical reviews with the control functions.

### **Control functions (Risk, Compliance, Internal Audit)**

The control functions are involved in the design and ongoing oversight of the Remuneration Policy and in performing regular reviews:

- The Risk Management Function should assist with and inform on the definition of suitable risk-adjusted performance measures (including ex post adjustments), as well as with assessing how the variable remuneration structure affects the risk profile and culture of the institution. The Risk Management function should validate and assess risk adjustment data.
- The Compliance function, in cooperation with Human Resources, performs a periodic analysis of the compliance of the Remuneration Policy with the applicable regulatory requirements.
- The Risk and Compliance functions should provide effective input in accordance with their roles into the setting of bonus pools, performance criteria and remuneration awards where those functions have concerns regarding the impact on staff behaviour and the riskiness of the business undertaken.
- The Internal Audit function should perform independent and regular review of the design, implementation and effects of the Bank's Remuneration Policy, on its risk profile and the way these effects are managed in line with the EBA Guidelines on sound remuneration policies under Directive 2013/36/EU (EBA/GL/2021/04).

The aforementioned control functions are further responsible for reporting on the review to Executive Management Board, to the specialised Committees and to the Board of Directors.

The Bank has the responsibility to identify its members of staff whose professional activities have a material impact on its risk profile. This assessment is performed annually with the support of the Human Resources function together with the control functions. The situation is reviewed by the Executive Management Board and supervised by the Appointments & Remuneration Committee. The ultimate responsibility, however, sits with the Board of Directors.

Based on the internal assessment, EDB has concluded that 47 employees have a material impact on the Bank's risk profile and consequently should be considered Material Risk Takers for the purposes of the Remuneration Policy, namely:

- Members of the Board of Directors;
- Members of Executive Management Board;
- Members with managerial responsibility for the control functions or material business units; and
- Staff members entitled to significant remuneration in the previous or current financial year where they are entitled to significant remuneration equal to or greater than € 500,000 / average remuneration awarded to the members of Board of Directors and Executive Management Board and where they are performing professional activities within a material business unit and their activity having a significant impact on the relevant business unit's risk profile.

In addition to staff members identified under the above criteria, other staff members shall be deemed to have a material impact on an institution's risk profile.

The assessment of the Identified Staff and Material Risk Takers are based on both qualitative and quantitative criteria (see Articles 5 and 6 of Commission Delegated Regulation (EU) 2021/923).

In relation to qualitative criteria, such staff members shall be deemed to have a material impact when managerial responsibility exists for:

- (i) Legal affairs;
- (ii) Soundness of accounting policies and procedures;
- (iii) Finance, including taxation and budgeting;
- (iv) Performing economic analysis;
- (v) Prevention of money laundering and terrorist financing;
- (vi) Human resources;
- (vii) Development or implementation of the remuneration policy;
- (viii) Information technology;
- (ix) Information security; and
- (x) Managing outsourcing arrangements of critical or important functions as referred to in Article 30 (1) of Commission Delegated Regulation (EU) 2017/565.

The list of Identified Staff and Material Risk Takers is monitored by the Human Resources function on a regular basis and updated at least once a year.

Due to size and the scope and complexity of activities, EDB does not fall under the definition of a significant institution as set out in Article 131 Directive 2013/36/EU. In the framework of this Policy, and in the light of the analysis and assessment performed by the control functions, reviewed by the Appointments & Remuneration Committee and validated by the Board of Directors, EDB resorts to the proportionality principle taken into account the size, internal organisation as well as the nature, scope and complexity of the Bank's activities as per EBA Guidelines, LFS Law and CSSF Circular 12/552 as amended. The proportionality principle encoded in Article 38-5 of the LFS Law aims to apply remuneration requirements in a proportionate manner taken into account Part 4 of EBA Guidelines (EBA/GL/2021/04). The proportionality analyses are conducted by the control functions and results are reported to the Appointments & Remuneration Committee for oversight and assessment before the final validation of the Board of Directors. This proportionality requirement is reassessed at least on an annual basis.

In this context of the EBA Guidelines on sound remuneration policies EBA/GL/2021/04 and CSSF Circular 22/797, EDB applies the waiver to the below requirement:

- To pay out 50% of variable remuneration in shares and or equivalent instruments for staff members. EDB can use shares and or equivalent instruments as part of variable remuneration for identified staff;
- To defer a substantial portion of the variable remuneration over period which is not less than four to five years; and
- To hold discretionary pension benefits If the employee leaves the bank before retirement.

EDB is performing a bi-annual performance review on individual basis and has processes in place to align the business and individual goal setting throughout the Bank. The performance review and assessment is used to determine the variable remuneration components. Both financial and non-financial factors are taken into consideration when determining the individual's variable remuneration, i.e. compliance with the Group's core values, internal guidelines and procedures, including customer and investor related guidelines. For Identified Staff the performance assessment of two years in a row need to meet the above mentioned criteria to trigger any variable remuneration payments.

All staff receives a fixed base salary as determined in the employment contract. In addition to this salary, employees receive benefits and might receive variable remuneration components.

Base salary levels are intended to compensate all employees based on their level of responsibility, qualification, experience, and involvement in tasks entrusted together with their particular set of competencies. Base salary levels are set on the assumption that the employee may not receive a variable remuneration and this is the sole source of income. The individual base salary paid are in line with the requirements of the classification as per official convention (Collective Bargaining Agreement) for the staff covered by such. For other staff not covered by the aforementioned convention, the base salary is determined by the Executive Management Board or the Board of Directors, depending on the case.

In addition, EDB may grant on a purely discretionary basis, an amount of variable remuneration to be paid at the end of the year to each member of staff taking into account a performance assessment as set out above. This variable remuneration does not constitute an acquired right for staff neither in principal nor in the amount. Furthermore, the amount of the variable remuneration depends on the overall financial performance of EDB / Apex Group as well as on the individual performance of the employees. The total volume of variable remuneration shall not limit the capacity of EDB to reinforce its financial base.

Each employee is appropriately remunerated by the fixed remuneration package. The variable remuneration only represents additional remuneration and is not guaranteed. Furthermore, an appropriate balance between fixed and variable remuneration components should be maintained. For Identified Staff and Material Risk Takers variable remuneration can't exceed 100% of fixed remuneration. In exceptional cases a 200% ratio can apply, following Shareholders' approval and specific procedure of validation and approval by the regulator.

For employees of the Internal Control Functions, the fixed remuneration is a predominant component of the total Remuneration. Therefore, the maximum variable remuneration is limited to 25% of the annual salary. The Bank does not offer any guaranteed variable remuneration. In some exceptional situations the below mentioned variable remuneration can be offered:

- Sign-on bonus – May be offered in case of new hires and if individual holds any outstanding unvested awards that are forfeited on resignation from the previous employer;
- Retention bonus – No retention bonuses are anticipated for the staff. However, where such practice would be foreseen, the Bank is following the specifications as provided under EBA Guidelines; and
- Extra Severance Payment – EDB does not offer guaranteed exit packages. In cases of early termination of a contract, the Bank will only make severance payments which are in accordance with the provisions of the applicable employment law. In addition, any severance payment should reflect performance achieved over time and should not reward failure or misconduct.

As an ex-post risk adjustment mechanism, in certain circumstances the bank is entitled to retain, reduce or eliminate variable remuneration awarded to any employee (malus) or reclaim amounts already paid out (clawback) up to 100% of the variable remuneration.

The following malus or/and clawback arrangements have been defined:

- In cases of fraud or other misconduct with intent or gross negligence which led to significant losses for the Bank or failure to meet appropriate fit and proper standards;
- It has been proven that the relevant staff member failed to meet appropriate standards of fitness and propriety (e.g. if an employee acts fraudulently or dishonestly); and
- In case of inappropriate behaviour of the employee, such as harassment or failure to comply with the Code of Ethics and Standards of Conduct of the bank or the Group.

The Bank and Apex Group adheres to gender neutrality and equal opportunity principles to ensure equal treatment regardless of gender and any other form of diversity, basing evaluation and remuneration criteria exclusively on professional ability.

With reference to inclusion, the Bank guarantees that all its staff are treated without distinction, exclusion, restriction or preference, whether direct or indirect, based on their: age, gender, sexual orientation, civil status, religion, language, ethnic or national origins, physical or mental disabilities, state of pregnancy, maternity or paternity (including as a result of adoption), personal convictions, political opinions, and/or trade union affiliation or activities.

In order to demonstrate that the Policy is gender neutral and supports the equal treatment of staff of different genders Human Resource department performs an analysis on the development of the gender pay gap<sup>1</sup>.

---

<sup>1</sup> The gender pay gap is the difference in average gross hourly earnings between women and men. It is based on salaries paid directly to employees before income tax and social security contributions are deducted. Calculated this way, the gender pay gap does not consider all the different factors that may play a role, for example education, hours worked, type of job, career breaks or part-time work. To ensure that work done by different staff is comparable, institutions need to properly document the responsibilities of staff or have a job classification system in place.
